**Software Developer**

☎ 9742544825

=====

## **Summary**

- Having around 4 + years of experience of Enterprise application/ Software service industry experience in the area of development, enhancement, deployment, maintenance, customization, integration and support
- Involved in all phases of the project i.e. Coding, Documentation, Designing the forms, unit testing and implementing products include reviewing functional and technical requirement, performing research, designing solution and developing code in a variety of programming language for a web based enterprise application
- Excellent team player and possess leadership quality
- Working knowledge in application development using Core Java SE 7 & 8, JAVA EE
- Software development approaches - Agile methodology
- Customer/Client Interaction Experience 3.7 Years
- Passionate about technologies like AI

## **Summarized**

Language	Java/J2EE, Python Basic
Hands-on	Core Java, J2EE, Web Services, XML, Elastic Search
Tools & IDE	Eclipse, My Eclipse, Maven, FORTIFY
Modules	TeamConnect Legal, Collaborati Spend Management (CSM), Elastic Search, Insurance, Data Ware House
Web Technology	Spring, Hibernate, Web Services and Spring Boot
RDBMS	Oracle
Operating Systems	Windows, Unix basic

## **Professional Experience Highlights**

### **1. TeamConnect Legal**

(March 2017 – October 2019)

**Organization :** Mphasis India Limited, Bangalore

**Client :** AIG(American International Group)

#### **Description of the project:**

- TeamConnect is a workflow engine and a Legal matter management system developed on J2EE architecture by Mitratesh (www.mitratesh.com).
- Within AIG, it has been deployed on WebSphere Application Server and uses Oracle database.
- Implemented the Claims eBilling and Matter Management application for Property and Casualty and other lines of businesses for US.

**Roles and Responsibilities:**

- Analysis of requirements and Develop software as per project defined software process
- Develop and Peer Review of LLD (Initiate/ Participate in Peer reviews)
- Analysis, technical design, and programming assignment
- Execute test plans, create test cases test data and contribute to appropriate software (including programming languages) development life cycle methodology and application of specialized business and technical knowledge
- Adherence & Contribution to process improvements, Prepare/ Analyze/ Review system documentation
- Project Competencies and Behavioral Competencies
- Implementation and Usage of project related tools
- Elastic search setup and usage patterns
- Resolve technical issues of projects and Explore alternate designs.
- Enhancement /Up gradation of TeamConnect from version 3.4 -> 4.x -> 5.x
- Integration of external Projects

**Software :** Core Java, J2EE, Web Services, XML, JavaScript, HTML

**2. Global Accounting Information Network (GAIN)**

(June 2015 – Feb 2017)

**Organization :** Mphasis India Limited, Bangalore

**Client :** AIG(American International Group)

**Description of the project:**

- Global Accounting Information Network (GAIN) is an application based on the AIU (American International Underwriters) framework exclusively developed for all the AIG applications.
- GAIN application is used to Quote and Book different policies under the P&C Insurance segment. GAIN application is used by the Underwriters to quote and code different policies for different accounts in and around US.
- GAIN is a distributed system where in it communicates with different other applications using web service calls and then it processes and passes the data to the downstream applications for further processing.

**Roles and Responsibilities:**

- As a programmer, Responsible for developing the notification module using core java and API s like Java Mail, Log4j.
- Developed internal utilities for analyzing logs as well as the reporting utilities using core java, spring etc.
- Worked on Source code analyzer tool called FORTIFY and fixed the issue listed under fortify, as it identify and remediate security vulnerabilities in software in order to mitigate enterprise security risks.
- Analysis, technical design, and programming assignment □ Implementation and Usage of project related tools

**Technology Used:** Core Java, Servlet, JSP, Struts, spring, Hibernate, JDBC, Java mail, Log4j

## **Miscellaneous**

- Active member of Stack overflow - <https://stackoverflow.com/users/4255938/prathamesh>
- Python Certified from **Mphasis**.
- Good command in machine learning, Here is the github profile - <https://github.com/prathamket>
- Active member of Hacker Rank - <https://www.hackerrank.com/prathamket>

## **DECLARATION**

I hereby declare that the above furnished details are true to the best of my knowledge and belief.

Place : Bangalore

Date :

Yours sincerely,

**Prathamesh**
